Dear Aeromodeller reader

First of all many thanks for letting us know you are interested in a re-launch of Aeromodeller.

We have now set a date for the first issue, it will be on sale on 18th October and we aim to publish 6 times a year (every 2 months). If response is good we will eventually make this a monthly publication..

So we need your support.

You can take a subscription by calling us on 01525 222573 or faxing to 01525 222574

You can also take a subscription on our website at: www.aero-modeller.com

Or you can fill in the form below and send to us:

We will be covering all the traditional aero modelling areas, Free Flight, Control line, Indoor flying, RC (but not ready-to-fly models) plans and building features, engine, electric motor and battery testing. Our aim is to bring traditional model making back!

Again many thanks for your interest and remember we now have over 400 plans for sale on our website and cut parts sets available – so no excuses not to get building!

Regards
Alan Harman
